Art Unit: 1616

Under PCT restriction practice, claims wherein there is a unity of invention shall be considered as a group. Claims have a unity of invention when they are linked by a special technical feature. Thus, composition, method of making and method of using claims directed to the same invention are examined together. However, applicants now claim plural neoplasia disorders in claims 146-154. Each disorder constitutes a unique special feature because each presents unique symptoms. Thus, applicants must elect one ultimate disorder for examination.

Applicants are advised that upon a review of the claims for the election of species requirement, that in claim 145, the species "capillary, cavernous, ependymal, epitheloid, fibrolamellar, meningeal, mesothelial, oligodendroglial, pancreatic polypeptide, pineal cell, submesothelial" appear to be indefinite because the cancer is not specified. Additionally, claims 163-165 appear to duplicate claim 155 and claims 173, 174 appear to duplicate claim 166.

Any inquiry concerning this communication should be directed to Edward J. Webman at telephone number 571-272-0633.
